

HOW TO USE A MOSQUITO DUNK!

safe!
simple!

cheap!
effective!

1. GRAB A BUCKET

2. FILL WITH WATER

3. ADD A HANDFULL OF STRAW OR GRASS

4. LET IT STEEP IN THE SUN FOR A COUPLE DAYS

5. ADD A MOSQUITO DUNK!

AND...

YOU'RE DONE!

WHAT IS A MOSQUITO DUNK?

- a donut-shaped larvicide disk
- dunks contain a naturally occurring soil bacterium *
- the bacterium produces toxins that specifically target the larvae of mosquitos

* *Bacillus thuringiensis israelensis*

WHAT'S HAPPENING IN THE BUCKET?

- ↳ fermentation attracts female mosquitos and they lay eggs
- ↳ the dunk gradually releases larvicide into the water
- ↳ the larvae eat the larvicide and die

DUNKS ARE SAFE FOR:

- | | |
|---|--|
| <input checked="" type="checkbox"/> people | <input checked="" type="checkbox"/> bees |
| <input checked="" type="checkbox"/> pets | <input checked="" type="checkbox"/> swimming pools |
| <input checked="" type="checkbox"/> fish | <input checked="" type="checkbox"/> rain barrels |
| <input checked="" type="checkbox"/> birdbaths | |
| <input checked="" type="checkbox"/> tadpoles | |
| <input type="checkbox"/> mosquitoes | |

- replace dunk once a month
- add a stick as an escape route for other critters
- to childproof your bucket, add a lid and cut out a one inch diameter hole
